

Welcome to the June 2018 issue of the Langford newsletter bringing you product updates and the latest in the Ontario Electricity Industry.

What's On

Global Adjustment V2 Solution Webinar, June 7 at 1:30 EST. See [Schneider](#) and [below](#).

Power Talks Montly Webinars, see [Schneider](#) and [below](#)

Ontario News

Politics and Electricity - In the deluge of electricity news in the upcoming election, we have chosen a few of the (hopefully) less partisan stories.

- How does the Ontario Hydro system work? The Canadian Press explains how it works and how the PC and NDP party's proposals could affect it. See [NationalPost](#)
- Hydro One's CEO is not taking the blame for high electricity prices. See video on [BNN](#),
- Many Ontario Businesses are Eligible for Hydro Refunds, Ahead of Election See [newswire](#)
- Despite recent controversy over executive pay, Hydro One's quarterly profit was up 33 per cent year-over-year. See [TheGlobeandMail](#)

Destruction of Documents - Trillium Power is making public new evidence it alleges shows staff from the office of former Premier McGuinty and the Minister of Energy engaged in the destruction of documents. See [Global](#)

Fleet of SMRs - Demand from Canada's mining sector could support a fleet of cost-effective small modular reactors, including up to 2 GW of capacity in Ontario's Ring of Fire development, according to OPG. See

Product Spotlight - Global Adjustment V2 Solution

Join us on Thursday June 7th at 1:30PM EST for the **Global Adjustment V2 Solution webinar** (30 minutes long) to get an update on the latest advancements in Schneider Electric's Global Adjustment solution portfolio.

Global Adjustment represents a significant savings opportunity, but can be confusing and often daunting to know how to take advantage.

[NuclearInsider](#) In a related story, Canadian Nuclear Laboratories has hired over 100 new scientists, engineers and other technical professionals from around the world. See [CNL](#)

U.S. Weighs In on Storage - The U.S. House has approved a measure backed by the Michigan delegation that officially opposes the permanent or long-term storage of spent nuclear fuel or other radioactive waste near the Great Lakes. See [Detroitnews](#)

New programs - The government has launched two new GreenON programs: GreenON for small and medium businesses and Solar Rebates. They also announced the International Energy Demonstration Fund to support local clean energy innovators in new international markets. See [Ontario](#) and [Ontario](#) In a related story, the government has also launched four new wood heat pilot programs. See [Ontario](#).

Low-carbon Thermal - The City of Toronto and Enwave Energy Corp, have established a partnership to co-develop low-carbon thermal energy networks in Toronto as part of the City's TransformTO Climate Action Strategy. See [GlobeNewswire](#)

Unintended Consequences - A group of about 60 families based north of Chatham, has struggled to convince the Liberal government that the area's wind farms are ruining their well water. See [TVO](#)

Excellence - The CEA has launched the first Canadian Electricity Centre of Excellence. See [CEA](#).

Product Spotlight - Power Talks

Schneider Electric is offering a series of Power Talks webinars to discuss the power and energy space.

- **Energy Performance:** Boost Your Energy IQ!
(Available On Demand)
- **Power System Performance:** Be on Top of It!
(Available On Demand)
- **Power Quality Performance:** Don't Risk It!
Wednesday, June 27, 09:00 AM CDT

With the updated solution from Schneider Electric we have made it even easier to know if a provincial peak is likely to occur and give you the tools to act. .See [Schneider Electric](#)

Did You Know- Municipal Energy Profile

The IESO has released the *Ontario Municipal Energy Profile* which provides insight into municipal energy use and found that municipalities are more engaged in energy management than ever before.

Between 2010 and 2017, overall municipalities reduced their electricity consumption by 6% and approximately 75% of municipalities completed at least one project through the Save on Energy programs.

The report also identifies opportunities to further improve energy efficiency in the sector. For the full report see [IESO](#)

Radian Research - WECO-300 Desktop Meter Test Station

The WECO-300 is a portable, 'office based' solution that provides a safe environment to perform a wide range of functional meter tests. The most recent version is more versatile with a choice of 75VA or 750VA to power any meter disconnect. When combined with the Radian Research RM-17 the WECO-300 can deliver accuracy and flexibility beyond commercial desktop top watt-hour meter test stations. See [Radian](#)
